DESIGN

CONSTRUCTIVE DESIGN

All the materials used correspond to the requirements according to RAL-GZ 430/3

Fully upholstered bench, wooden base frame

Seat upholstery structure: zig-zag springs, Dacron, polystyrene foam VW 40, 80% foam sticks VW 40, 20% silic. hollow fiber, Diolen

Back upholstery structure: rubber straps, polystyrene foam , 80% foam sticks, 20% silic. hollow fiber, Diolen

UPHOLSTERY VERY CASUAL

With casual upholsteries you are rather sitting „in the sofa“ than on it, the upholstery snuggles. A particularly casual upholstery is characterized by a very comfortable and soft surface. Even when new or after initial use, the covers can show a clearly visible wave pattern on the seat, back and armrests, which is unavoidable due to the design, construction and material and will increase with use. The size of the sewn covers also has a similar influence on sinking and cover stretching. The softer the upholstery and the larger the seat surface, the greater the sinking in and ultimately the cover stretching. This high quality upholstery with bay quilting contains a flexible mixture out of loose filling material as foam sticks and/ or plumes that enables a point adaptation to the body. For this the fillings are worked in separate bays that according to the cover come more or less apparent. Sitzmarks are due to model and design typical.

Slight differences in seat firmness with add-on groups are according to construction and therefore constitute no grounds for complaint.

BACK TENSIONING SECTIONS

All back tensioning sections are supplied as standard with the original cover.

CHAIR

With this model we recommend the suitable chair 1223.

CONTRAST STITCHING

The production is carried out either **with contrast stitching** or with a **thread (tone on tone)** matching the leather in terms of colour.

CONTRAST STITCHING

With leather covers and with fabric-leather-combinations a **contrast thread colour** must be explicitly chosen.

With bicoloured covers the thread colour will be worked on the front and on the rear side.

Unfortunately with fabric and microfiber covers without leather part a processing with contrast stitching is not possible.

Exception fabric 13-BISON:

These fabric can be produced with contrast stitching. A contrast thread colour must be explicitly chosen.

THREAD TONE ON TONE

The model is worked with a thread matching the cover in terms of colour (tone on tone).

With bicoloured covers and with fabric-leather-combinations the matching thread will be automatically worked on the front and on the rear side.
